Re: Docket #98P-1194

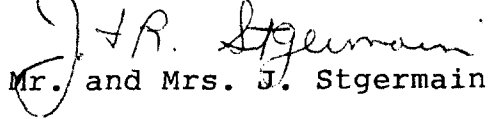

Gentlemen:

I am calling to let you know we strongly support the Center for Food Safety's lawsuit calling for the removal of r-BGH from the market. We take this position given the very real human and animal health concerns.

We feel it is unconscionable to allow Monsanto (or any other company) to cover up the test results, and allow r-BGH to be injected into cows for more milk. We do need any more milk production in this country.

Furthermore, you are opening yourself up to more lawsuits from the general population as word spreads that this biotechnology product is causing breast and prostatic cancers.

Sincerely yours,

Mr. and Mrs. J. Stgermain

98P-1194

C161.
